

Development Services

BSP Pharmaceuticals is a Contract Development and Manufacturing Organization focused on innovative cytotoxic and non cytotoxic products for oncology, immuno-oncology, CNS and other relevant therapeutic indications.

The Manufacturing plant is located in Italy, 40 miles southbound of Rome.

BSP Pharmaceuticals provides a full range of integrated services aimed to support the entire life cycle of a product as described below:

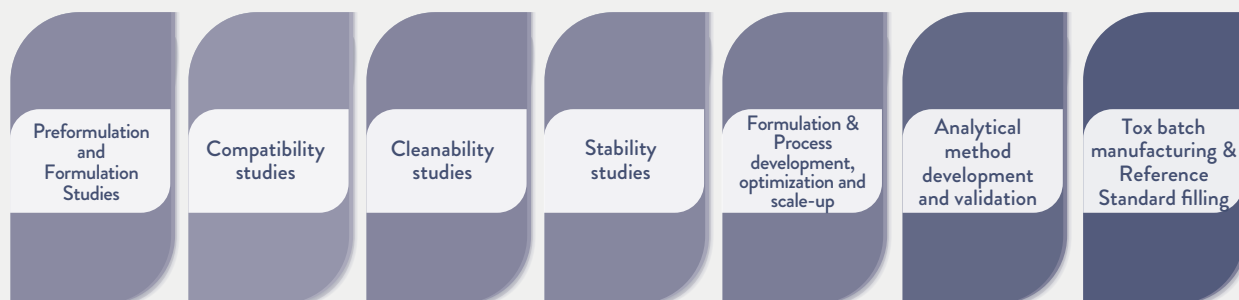

A team of scientists that works in tight connection with manufacturing personnel, represents a unique combination of knowledge, skills and competences that can make the difference in moving the product quickly to clinic and to the market.

This work mode allows:

- To switch quickly from **development to clinical** and **commercial production**.
- To make the **scale-up** of the product internally without the need to transfer the product elsewhere.
- To **reduce** technical issues and constraints when changing manufacturing scales and batch size.
- To **support cGMP manufacturing** during preliminary tech transfer phase and with the possibility to run customized trials and experiments for trouble-shooting.

BSP DEVELOPMENT DEPARTMENTS WORK ON:
